1. Claims 3 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 6, "said handle" lacks antecedent basis. As best understood, "said handle" should be --said portion of said handle--.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fisher.

Note the first socket element (2, 3,10), the second socket element (8), and handle (1).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher in view of Scull.

Fisher discloses all of the claimed subject matter except for having square hole in the handle. Scull discloses a square hole in the handle. It would have been obvious to

one having ordinary skill in the art to form the device of Fisher with a square hole to enable the engagement of a wrench to provide torque thereto as taught by Scull.

6. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher in view of Scott.

Fisher discloses all of the claimed subject matter except for having an elongate arm. Scott discloses a first socket element (8), a second socket element (1), and an elongate arm extending from the first socket element and having plural openings (9) therein. It would have been obvious to one having ordinary skill in the art to form the adjusting elements of the device of Fisher as an arm extending from the first socket element and having openings therein to allow for the adjustability thereof as taught by Scott.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher in view of Scott as applied above, in further view of Scull.

Scull discloses a square hole in the handle. It would have been obvious to one having ordinary skill in the art to form the device of Fisher with a square hole to enable the engagement of a wrench to provide torque thereto as taught by Scull.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra S Meislin whose telephone number is 703 308-3671. The examiner can normally be reached on M-F, alt. Fridays off.
